

NUVOLATI

Gavi DOCG - locality of Gavi

Grape variety

Cortese.

Geographical location

Locality of Gavi, in the province of Alessandria, Piedmont.

Soil

Sandy, rich in limestone marl, comprising white and red soil.

Organoleptic properties

A white wine with a good character, straw yellow colour with delicate green hues. Intense, persistent bouquet, fruity and flowery depending on its age. Pleasantly dry taste, harmonious and elegant.

Serving suggestions

Excellent as an aperitif wine, its taste is exalted when served with appetizers, fish dishes and shellfish.

Serving temperature

10° C

Formats available

0.75 l
